

# The Amazing Soybean

## Other uses of soybeans

**Biodiesel-** can be use as fuel to run tractors and trucks.

**Bio-composites-** building materials made from recycled newspaper and soybeans. They replace other products traditionally made from wood, such as furniture, flooring, and countertops.

**Particleboard, laminated plywood and some lumber-** made with soy-based wood adhesives.

**Soy products-** found in many popular brands of home and commercial carpet, and in auto upholstery applications.

**Soy oil-** produces an environmentally friendly solvent that safely and rapidly removes oil from creeks, streams and shorelines without harming people, animals and the environment. Soy is an ingredient in many industrial lubricants, solvents, cleaners and paints.

**Candles-** made with soybean oil burn longer but with less smoke and soot.

**Soy Ink-** is superior to petroleum-based inks because soy ink is not toxic, renewable and environmentally friendly, and it cleans up easily.

**Soy crayons-** made by the Dixon Ticonderoga Company replace the petroleum used in regular crayons with soy oil making them non-toxic and safer for children.

**Soybean Meal Products and By-Products-** (soybean oil, candles, lotion, carpet, composite, particle board, crayons newspaper(soy ink), Foods with Soybean oil in them.
